Apeksha Vinod Masodkar

Full Stack Web Developer

PROFESSIONAL SUMMARY

Dedicated Full Stack Web Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js) with a strong aptitude for Generative AI. Proficient in creating scalable web applications, adept at rapid tech stack adaptation. Excellent problem-solving and collaboration skills ensure seamless team integration and project success.

PROJECTS

1. BlueFly Clone | 🌐 | 🛡️

React | HTML5 | CSS3 | Git | JavaScript | Redux

- Developed a web application replicating BlueFly functionalities using React.
- Implemented user authentication and product management systems for secure experiences.
- Built a responsive design with Chakra UI for consistent multi-device usability.
- Managed state efficiently with Redux, showcasing advanced state management skills.
- Handled routing and sorting functionalities to enhance site navigation and interaction.

2. Age-calculator | 🌐 | 🛡️

HTML5 | CSS3 | Git | JavaScript

- Developed a user-friendly Age Calculator web application using HTML, CSS, and JavaScript.
- Implemented form validation to ensure accurate input for day, month, and year of birth.
- Calculated age in years, months, and days based on user input.
- Ensured cross-browser compatibility and responsiveness for enhanced user experience.
- Utilized Git for version control, enabling efficient project management and collaboration.
